

PRODUCT SPECIFICATIONS

9000 RADIO HANDHELD

HRBA9000 (Baseball) | HRBK9000 (Basketball) | HRFB9000 (Football)

OLED Display. The 9000 Handheld Consoles have an OLED display, making navigating the menus easy. All information will be displayed on one easy to read screen.

2.4 GHz Radio.

Radio control comes standard with a 500 ft capable internally installed antenna. This powerful handheld console uses the same radio as the MSC9000 Desktop Console, and either can be used with any 9000 Series Scoreboard while using the same ID scoreboard selection system*.

Rechargeable Lithium-Ion Battery.

Enjoy over 9 hours of play on a single charge. Fully charge within 3 hours with a standard USB-C cable.

Responsive Tactile Keypad.

No time to read the manual? Simply power up and go. With one keystroke choose to connect to multiple scoreboards, resume a previous game, or start choosing what boards to use and what game to play.

HRBA9000 (Baseball)

HRBK9000 (Basketball)

HRFB9000 (Football)

Silicone Rubber Protective Case.

Designed to be as strong as your athletes, the silicone rubber case will help keep the handheld console operational for years to come. Slide the console out to access the protected USB-C charging connector.
