A	RELEASED FOR SPEC	6/20/2019	TJL

2 cable harnesses with locking connectors will be required to connect top board to bottom board. This connection is required as the top board is being lowered down to the bottom board.

AC connection is at back of board. The power box (supplied by others) can be mounted to either knockout on plate, which was designed to allow flexibility when poles are positioned where the power is routed.

The power inlet is typically on the back opposite of the HOME score
