OPERATING INSTRUCTIONS AND SERVICE MANUAL

BASEBALL SCOREBOARDS

Models MP-2375 / MP-2376

EFFECTIVE S.N.1180, APRIL 1987

TABLE OF CONTENTS

1. General Information

- 1.1 Description
- 1.2 Damage
- 1.3 Damage Claim procedure

2. Installation

- 2.1 General Information
- 2.2 Mounting
- 2.3 Data Cable Installation
- 2.4 Electrical Connection

3. Control Console Operation

- 3.1 Scoreboard Power
- 3.2 Control Console Power
- 3.3 Control Console Display
- 3.4 Team Scores
- 3.5 Inning
- 3.6 Ball, Strike, Out
- 3.7 Hit, and Error
- 3.8 Dimmer

4. Maintenance And Troubleshooting

- 4.1 Introduction
- 4.2 Test Equipment
- 4.3 Troubleshooting
- 4.4 Troubleshooting Guide

5. Replacement Parts List

- 5.1 Scoreboard Display Parts
- 5.2 Controller Assembly Parts

6. Diagrams

- 6.1 Control Console Keyboard and Insert (Slipsheet)
- 6.2 Scoreboard System Layout
- 6.3 Press Box Junction Box Wiring (B-121273)
- 6.4 Controller Plate Wiring and Layout (D-150053)
- 6.5 Five Position Driver Bd. Jumper Location (B-151285)
- 6.6 Triac Placement Diagram
- 6.7 4X7 Lamp Pattern (8 Bit) (A-12497)
- 6.8 Figuregram Wiring Diagram (A-13591,A-13534,A-13592)
- 6.9 Erection Drawings

1. GENERAL INFORMATION

1.1 Description

Your All-American Player Name Panel has been carefully inspected before leaving the factory. It is possible, however, that components may be loosened or forced out of adjustment in transit. If this occurs, use the enclosed diagrams to correct the problem or contact the following:

ALL-AMERICAN Service Department
EVERBRITE Corporation
P. O. Box 97
Pardeeville, WI 53954
Telephone: (608) 429-2121
Toll Free: 800-356-8146 (outside Wisconsin)

Parts being returned for repair are to be sent to:

ALL-AMERICAN Service Department
EVERBRITE Corporation
413 South Main Street
Pardeeville, WI 53954

1.2 Damage

Upon receipt, check for visible damage. If this occurs, or if damage is found after shipment has been accepted, follow the damage claim procedure.

1.3 Damage Claim Procedure

An instruction sheet is enclosed advising the Consignee in case of damage in transit.

If damage is noted at time of delivery, Consignee must obtain an Inspection of Bad Order from the delivering carrier. In order to process your claim, this must be properly filled out with a complete statement of all damage and signed by the carrier.

If damage is discovered after delivery, you should call the delivery company. Have them make out a Concealed Damage report. Fifteen days after delivery are allowed, so this should be done PROMPTLY or it is impossible to process this claim.

Advise EVERBRITE Corporation of necessary replacement parts, or repairs. Consignee will be invoiced and then should file a claim with the carrier to recover charges.

TO FILE YOUR CLAIM FOLLOW THIS PROCEDURE:

- (A) Cost of replacement parts or repair charges are invoiced to the carrier by the Consignee.
- (B) The following documents, plus invoice are forwarded to the Trucking Company in support of your claim:
 - (a) Original bill of lading.
 - (b) Original paid freight bill.
 - (c) Certified copy of original invoice.
 - (d) Standard form for Presentation of Loss and Damage Claim, properly filled out.

2. INSTALLATION

2.1 General Information

Check shipment and if damaged file damage claim.

Shipping papers accompany each scoreboard. Check carefully to see that you receive the following:

- 1 ea Baseball Display
- 1 ea Control Console
- 1 ea Service Manual
- 1 ea Mounting Hardware Package
- 1 ea Junction Box
- ? ft Control Cable (if ordered)

2.2 Mounting

For permanent mounting to uprights, see the enclosed installation drawing in section 6.

2.3 Data Cable Installation

The MP-40 data cable is approved for direct burial and therefore can be installed with or without conduit. Consult section 6 for junction box and scoreboard wiring.

2.4 Electrical Connections

The MP-2375 requires the following:

- (15 Watt Lamps) 110 V./ 60 HZ, 20 A. Service
- (25 Watt Lamps) 110 V./ 60 HZ, 30 A. Service

The MP-2376 requires the following:

- (15 Watt Lamps) 110 V./ 60 HZ, 30 A. Service
- (25 Watt Lamps) 110 V./ 60 HZ, 40 A. Service

NOTE

This equipment complies with the requirements in Part 15 of the FCC rules for a Class A computing device. Operation of this equipment in a residential area may cause unacceptable interference to radio and TV reception requiring the operator to take whatever steps are necessary to correct the interference.

3. CONTROL CONSOLE OPERATION

3.1 Scoreboard Power

Turn on the branch circuit(s) to scoreboard(s). The Home and Guest scores will show "0".

3.2 Console Power

IMPORTANT

To protect the MP-2002 Control Console Electronics from lightning and other transient voltage spikes, it is advisable to disconnect the Control Console and store in a dry secure area, when it is not in use.

Plug the control console cable into the press junction box.

Push ON/OFF once to turn the console ON.

Push ON/OFF a second time to shut the console OFF.

The console display should show CODE when first on.

Enter the four digit code (2375 or 2376) shown in the lower center of the keyboard as in the following example:

Push CODE 2 3 7 5 ENTER

When the proper code has been entered the console display will show: 0000

3.3 Console Display

The 4 digit Liquid Crystal Display shows the information entered from the keyboard.

3.4 Team Scores

The Home and Guest Scores can be changed in three different ways.

(A) To Add 1 to the existing score: Push +1 .

(B) To directly enter or correct a score:

Push HOME or GUEST followed by desired number,
then ENTER .

Example: Present Home Score is 15. Change the score
from 15 to 23.

Push HOME 2 3 ENTER .

(C) To clear the score:

Push HOME or GUEST then 0 .

3.5 Inning

The inning is changed in the same way as the direct entry of team scores.

3.6 Ball, Strike, Out

Push BALL , STRIKE , or OUT once for each progressive illumination of the respective indicators.

3.7 Hit And Error

Push HIT or ERROR to illuminate the appropriate indicator.

3.8 Dimmer

Push NIGHT/DAY to either brighten or dim the lamps in the scoreboard display.

4. MAINTENANCE AND TROUBLESHOOTING

4.1 Introduction

This section gives maintenance and troubleshooting information. Included are troubleshooting guides for typical scoreboard malfunctions. If the cause of a problem cannot be determined, please contact the customer service department.

4.2 Test Equipment

A simple analog or digital voltmeter will be sufficient for all user repairable problems. Printed circuit boards requiring troubleshooting should be returned to the factory.

WARNING

110 VAC wires are exposed whenever the cover over the controller is removed from the scoreboard. Use extreme caution during troubleshooting or repair. To avoid possible damage always remove power before removing the cover or replacing assemblies.

4.3 Troubleshooting

Whenever possible, follow the troubleshooting guides prior to contacting the customer service department. If a problem not described in the guides exists, contact the customer service department immediately. Refer to the diagrams provided for assistance in troubleshooting scoreboard malfunctions.

4.4 Troubleshooting Guide

(A) Scoreboard Doesn't Light and Console Doesn't Work

- (a) Check that the main power switch is turned on.
- (b) Replace any defective or blown fuses.
- (c) Check the power connections and voltages at the scoreboard.
- (d) Contact the customer service department.

(B) Scoreboard Digits Don't Light But the Console Works

- (a) With the main power "off" remove the cover over the controller assembly.
- (b) Check all connections.
- (c) Turn main power "on".
- (d) If board still doesn't light check the transformer voltage going to the Receiver PCB assembly (blue wires) using a voltmeter set on the 12 VAC or higher scale.

If the voltage is less than 8 VAC contact the customer service department.

If the voltage is between 8-12 VAC see the replacement parts list for a Receiver PCB assembly, and contact the service department.

(C) The Scoreboard Digits Light But The Console Doesn't Work.

- (a) Check for continuity between the scoreboard and the junction box.
- (b) If an open circuit is found the problem is either the cable or a cable connection.

- (c) If the continuity test checks good then check the voltage between the green wire and the white wire in the junction box using a voltmeter set on the 12 VAC or higher scale.

If the voltage is 0 V see the Controller parts list for a transformer assembly.

If the voltage is less than 8 VAC consult the controller wiring diagram for instructions on long cable compensation.

If the voltage is between 8 VAC and 12 VAC contact the customer service department.

- (D) The Scoreboard Digits Light the Console Works but there Is No Control Of The Scoreboard.

- (a) Check the voltage between the black and red wires in the junction box with a voltmeter set on the 3 VDC or higher scale. (2-3 VDC when working properly)

If the voltage is 0 V contact the service department for assistance.

If the voltage is correct (2-3 V) check that this reading also appears at the scoreboard.

If the correct voltage also appears at the scoreboard see the replacement parts list for a Receiver PCB Assembly.

- (E) The Scoreboard Works But Some Lights Stay On All The Time

- (a) With the Main Power OFF, switch the plug from the bad digit with the plug for a known good digit.

Example: Plug "C" in "D" and "D" in "C" locations.

- (b) Turn the power back on. If the same lights remain lit, the problem is a shorted lamp socket. If the lights now stay on in a different digit the problem is the driver board. See the replacement parts list for the proper replacement driver board.

- (F) The Scoreboard Works But Some Lights Do Not Come On

- (a) Check for burned out lamps.
- (b) Check for broken wire or bad connection on 12 pin connector.
- (c) See the replacement parts list for the proper replacement driver board.

5. REPLACEMENT PARTS LIST

5.1 Scoreboard Display Parts

figure 1
DISPLAY ASSEMBLY

REPLACEMENT PARTS LIST (MP-2375/MP-2376)

fig. & index	MFG PART NUMBER	DESCRIPTION	REF DES	VENDOR PART #
1-	150132	Display Set (MP-2375)		150132
