1. GENERAL INFORMATION

1.1 DESCRIPTION

Your All-American scoreboard has been carefully inspected and tested before leaving the factory. It is possible, however, that components may be loosened or forced out of adjustment in transit. If this occurs, follow the troubleshooting guide (section 4). If equipment then fails to operate, contact immediately:

ALL-AMERICAN Service Department
EVERBRITE Corporation
P.O. Box 100
Pardeeville, WI 53954
Telephone: (608) 429-2121
Toll Free: 800-356-8146
E-mail score@everbrite.com

Parts being returned for repair are to be sent to:

ALL-AMERICAN Service Department
EVERBRITE Corporation
401 S. Main Street
Pardeeville, WI 53954

NOTE

If you need to send parts in for repair, please call the ALL AMERICAN service department for a returned goods authorization (RGA) number.

1.2 Identification

ALL-AMERICAN uses a 5 digit serial number for scoreboard identification. The serial number tags are located on the back of the control console and the lower right hand corner on the face of the scoreboard display. When contacting the factory for assistance it is important that the model number and serial number are known.

1.3 Damage

Upon receipt, check for visible damage. If this occurs, or if damage is found after shipment has been accepted, follow the damage claim procedure.

1.4 Damage Claim Procedure

An instruction sheet is enclosed advising the consignee in case of damage in transit.

If damage is noted at the time of delivery, consignee must obtain an 'Inspection of Bad Order' from the delivering carrier. In order to process your claim, this must be properly filled out with a complete statement of all damage and it must be signed by the carrier.

If damage is discovered after delivery, you should call the delivery company. Have them make out a Concealed Damage Report. Fifteen days after delivery are allowed, so this should be done promptly or it is impossible to process this claim.

Advise EVERBRITE corporation of necessary replacement parts, or repairs. Consignee will be invoiced and then should file a claim with the carrier to recover charges. To file your claim follow this procedure:

- (A) Cost of replacement parts or repair charges are invoiced to the carrier by the consignee.
- (B) The following documents, properly filled out, plus invoice, are forwarded to the trucking company in support of your claim:
 - (a) Original bill of lading
 - (b) Original paid freight bill
 - (c) Certified copy of original invoice
 - (d) Standard form for presentation of loss and damage claim

2. INSTALLATION

2.1 General Information

Shipping papers accompany each scoreboard. Check carefully to see that you receive the following:

- 1 ea Hockey Display
- 1 ea Control Console
- 1 ea Service Manual
- 1 ea AC Adaptor
- 1 ea Trumpet Horn

2.2 Inspection

Inspect each unit and tighten all screws, and fittings that may have loosened in shipment.

2.3 Pre-Test

Before installing the scoreboard, pre-test all functions.

- (A) Connect the scoreboard to a 15 AMP, 120 Volt AC service.
- (B) Plug the control console into the top of the scoreboard.
- (C) Test operate all functions on the scoreboard according to operating instructions in section 3 of this manual.
- (D) When all the functions test out, disconnect the power and the control console before hanging the scoreboard.

2.5 Electrical connections

This scoreboard requires a 120 VAC 15 AMP service for the exclusive use of the scoreboard.

NOTE

To protect the MP-5000R control from damage, it is advisable that you disconnect the control and store in a dry secure area when not in use.

NOTE

This equipment is **UL** and **NRTL** approved and complies with the requirements in part 15 of the FCC rules for a class A computing device. Operation of this equipment in a residential area may cause unacceptable interference to radio and television reception, requiring the operator to take whatever steps are necessary to correct the interference.

3. CONTROL CONSOLE OPERATION

3.1 Scoreboard Power

Turn on the branch circuit to the scoreboard. The scoreboard will show zeroes in the Home and Guest scores.

3.2 Console Display

The 2 line by 20 character Liquid Crystal Display module displays the scoreboard information entered from the keyboard. The following information is displayed continuously: Time, Home and Guest scores, Period, Goal, Auto Horn Enable, 1/10 Second Enable, and Penalty Timer Enable.

3.3 Console Power

Plug the control console cable into the wall junction box.

Push **ON/OFF** once to turn the console on.

Push **ON/OFF** a second time to shut the console off.

When first turned on; the console display should show as follows.

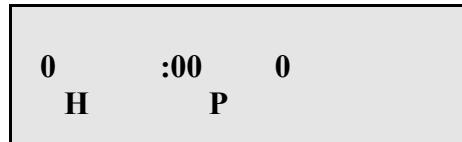

3.4 To Use Scoreboard

Enter the two digit code (40) shown in the upper right corner of the keyboard as in the following example:

Push **CODE** **4** **0** **ENTER** .

When the proper code has been entered, the timer on the scoreboard will show ":00", and the console display will show as follows.

3.5 Setup

The **SETUP** key will step through a list of options.

Press **YES/NO** or make Numeric Entries to make changes.

Pushing **ENTER** without any other input skips to the next item.

Pushing **CLEAR** exits setup, and all changes are kept.

Accurate time will be kept without power to the scoreboard for up to 2 months.

3.6 Time Control

The **UP/DN** key determines the timer mode. When in the UP mode an arrow up symbol is displayed next to the time on the LCD display. If in the DOWN mode there is no arrow displayed.

Switching the time toggle switch to the IN and OUT position, starts and stops the timer.

Push **RESET** to return the timer to the previously set value.

Push **EDIT** to change the timer to another value.

3.7 Team Scores

The Home and Guest Scores can be changed in two different ways.

(A) To add 1 to the existing score: Push **GOAL**.

(B) To directly enter or correct a score: Push Home or Guest **SCORE** followed by the desired number, then **ENTER**.

Example: Present Home Score is 15. Change the score from 15 to 23.

Push: Home **SCORE** **2** **3** **ENTER**.

3.8 Horn

The horn will blow when the **HORN** button is pressed.

The horn will blow automatically at the end of each period for 2 seconds.

The automatic horn function may be disabled in Setup.

An 'H' is displayed on the LCD when this function is enabled.

3.9 Goal Indicators

Pushing Home or Guest **GOAL** to add 1 point to the score will also illuminate the appropriate goal indicator. A '<G>' or 'G>' will be displayed while the goal indicator is illuminated.

3.10 Period Indicators

Push **PERIOD** once to increment the period indicator. The LCD display will show the period directly below the time.

3.11 Timeout Period

An automatic timeout period of 1 minute is provided for "Time Outs" when the main timer is not running.

Push: **TIME OUT TIMER** to start the 1 minute timer. The LCD will show "TIME OUT = 1:00" and start to count down. When 1 minute has elapsed the internal beeper sounds, and the display returns to the current game time.

If you want to return to play before the Time Out Timer gets back to zero,

push: **TIME OUT TIMER** **CLEAR** and the console will return to play mode.

3.12 Penalty Time Control

To set a penalty, Push Home or Guest **PENALTY**, followed by the Player

Number and then the penalty time, as in the following example for a 3 minute penalty for player number 25.

Push: **PENALTY** **2** **5** **ENTER** , **3** **0** **0** **ENTER** .

To view/clear penalty, Push **H** or **C** **STATS**. The LCD will step thru all active penalties, one at a time. While a penalty is displayed, Push **CLEAR** to remove it.

3.13 Shots On Goal

The Home and Guest Shots On Goal can be changed in the following way.

To add 1 to the existing shots: Push **SOG**.

The LCD will show S.O.G. = and the present total. Push the number keys for the new total followed by the desired number, then **ENTER**.

4. MAINTENANCE AND TROUBLESHOOTING

4.1 Introduction

This section gives maintenance and troubleshooting information. Included are troubleshooting guides for typical scoreboard malfunctions. If the cause of a problem cannot be determined, please contact the customer service department.

4.2 Test Equipment

A simple analog or digital voltmeter will be sufficient for all user repairable problems. Printed circuit boards requiring troubleshooting should be returned to the factory.

4.3 Troubleshooting

Whenever possible, follow the troubleshooting guides prior to contacting the customer service department. If a problem not described in the guides exists, contact the customer service department immediately. Refer to the diagrams provided for assistance in troubleshooting scoreboard malfunctions.

WARNING !!!

120 VAC wires are exposed whenever the cover over the power supply assembly is removed from the scoreboard. Use extreme caution during troubleshooting or repair. To avoid possible damage to equipment or personal injury, always turn off the main power before removing the cover or replacing assemblies.

4.4 Troubleshooting Guides

(A) Scoreboard doesn't light

- (a) Check that the main power switch is turned on.
 - (b) Replace any defective or blown fuses.
 - (c) Check the power connections and voltages at the scoreboard.
 - (d) Check to see that the Green LED on the power supply is lit.
 - (e) Check for 12 VDC at the power supply terminal.
 - (f) Contact the customer service department.
- (B) Control console doesn't turn on
 - (a) Check that the AC power to the AC adaptor is turned on.
 - (b) Replace any defective or blown fuses.
 - (c) Check the power connections and voltages in the control.
 - (d) Contact the customer service department.
- (C) The scoreboard digits light, the console works, but there is no control of the scoreboard.
 - (a) With the main power switch "off"; remove the cover over the power supply, and receiver.
 - (b) Check all connections.
 - (c) Turn the main power on.
 - (d) Turn the control console on and enter the code.

If LED D1 on the receiver board is flashing rapidly call the customer service department.
- (D) Scoreboard digits don't light, but the console works
 - (a) With the main power switch "off"; remove the cover over the power supply, and receiver.
 - (b) Check all connections.
 - (c) Turn the main power on.
 - (d) If the scoreboard still doesn't light, check the voltage between the positive and negative terminal strips on the power supply for 12 VDC with a voltmeter set on the 12 VDC or higher scale.

If the voltage is 12 VDC or greater, go to (e).

If the voltage is less than 12 VDC check the power supply input voltage for 120 VAC and contact the customer service department.

 - (e) Check LED D4 on the receiver board. It should be medium brightness.
Change the Dim level on the control console. D4 brightness should change.
 - (f) Check if LED D5 on the receiver board is on.

If D5 is on, check if D2 and D6 are flashing and call customer service department. The flash will be very fast. The LED's may appear to be on at half brightness.

If D5 is not on, check that the receiver board is plugged into the power supply and call the customer service department.

(E) The scoreboard works, but some digits do not change.

- (a) Find the driver board that controls the first digit in the shift order that is not working.
- (b) Check for 12 VDC at the driver board.
- (c) Reseat the data in ribbon cable connectors.
- (d) Swap the driver board with a driver further down the shift order.
- (e) If the digit still doesn't work call the customer service department.

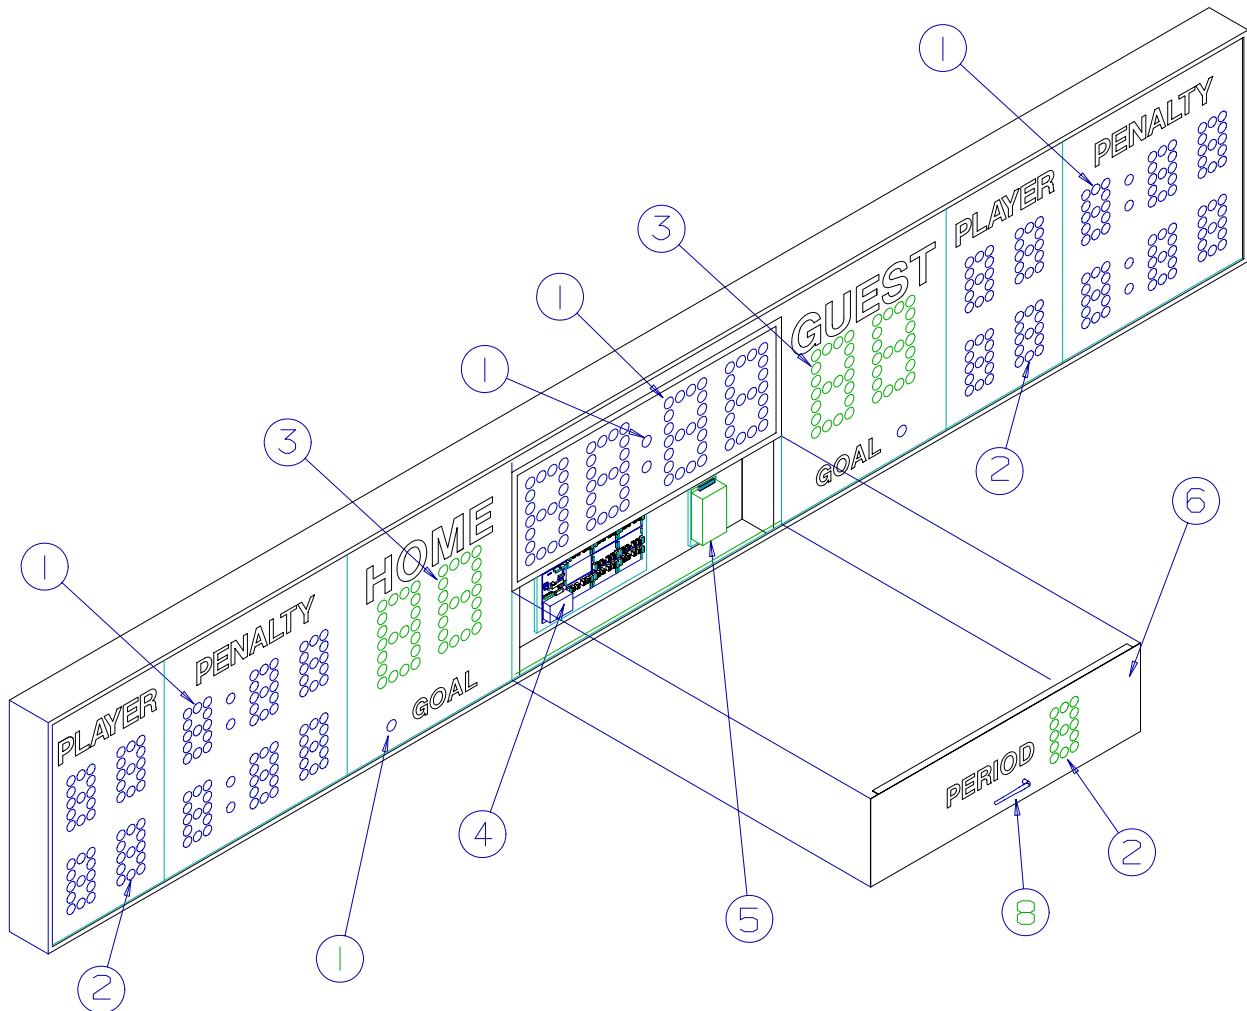

CLUSTER REMOVAL

If it becomes necessary to remove a LED cluster: Insert a pointed object, like the end of a ball point pen, into the two holes in the cluster retaining ring, and rotate the cluster until these holes are at 3 o'clock and 9 o'clock. At this position the cluster should be removable from the front of the face of the scoreboard.

Reverse the procedure to install the cluster.
